

Identifying And Treating Sepsis: Teams Making Change **July 22, 2008, 11:00 am-12:00 Noon – Audio Conference**

Historically, mortality rates for severe sepsis have been 30 to 50 percent; for septic shock, as high as 50 percent.

Join this call to hear how one hospital team has worked together using small tests of change to cut their sepsis mortality rates in half. Learn cutting edge approaches for early identification and treatment strategies for sepsis that you can use in your hospital.
